1. Attach the eye bolts to your gym walls. Arrange these eye bolts at each end of your gym in the following manner.

2. SIDEWALL VIEW: EYE BOLT POSITIONING

3. Attach the cables as follows: OVERHEAD VIEW

4. Hang up your net by attaching the net's thick Poly-Dac rope to the cables by means of snap rings. Rings should be 18" apart.

5. SIDE VIEW OF NET IN PLACE

6. “BATTER’S VIEW” OF CAGE #2 (Indoors)

7. To store your net, simply slide it along the cables to side wall.

8. If you want to take your net down, follow these steps:
   1. After you have your net in the “ready-to-be-moved” position, slide the net down to one end. (See drawing above.)
   2. Then, unhook the cables at the other end. (In other words, the end furthest away from the net.)
   3. Wrap the cables around the net.
   4. Unhook remaining turnbuckles.
   5. Store net in closet.

EYE BOLT

END WALL

CEILING

GYM FLOOR

Note: The “slope” of the net is important. The center of the net, for its entire 55' length, is 12' high. The sides of the net are only 10' 6" high, leaving 18" of net on your gym floor. This keeps batted balls inside the enclosed area.

CABLE & ROPE ATTACHED WITH SNAP RINGS

SNAP RINGS 18" APART

CABLE & ROPE WITH SNAP RINGS ATTACHED

EYE BOLT

CEILING

GYM FLOOR

Note: The cables should be placed and tightened to your frame sections or walls.

2. Stretch out your net on the ground underneath the cables.

3. Hook turnbuckle on to eye bolt extending from the wall or frame section. Then, run one end of your cable through the turnbuckle and secure using cable clamp. Tape end of cable to prevent fraying.

4. Repeat steps 2 and 3 at opposite end.

5. Tighten the turnbuckles at each end of the cable to provide tension to hold up the net.

Note: You should provide for extra cable length when setting up initially. You can always cut off excess cable if not needed.

Note: Drawings are not to scale.

CUSTOM NETTING of all shapes and sizes now available, including: Batting Cage Nets, Backstops, Trapezoid Backstops, Outfield and Foul Ball Netting.

There are 3 Ways for you to get more information and FREE estimates on JUGS Custom Netting:

1. Call JUGS at 1-800-547-6843 and ask for a Net Specialist.
2. Fax your specifications to a Net Specialist at 503-691-1100.
3. E-mail your specifications to jims@jugssports.com.

WARNING: Do not leave your net and frame up during extreme weather conditions (high wind, snow), as non-warranty damage may occur.

www.jugssports.com
**Batting Cage Net #2 Outdoor Installation Instructions**

**381-lb. and 691-lb. Breaking-Strength Knotted-Nylon Twine • Two-Year Guarantee, Available in Dark Green Only**

**1.** Once you assemble them, the end sections will look like this. Insert a short hanging-loop assembly into each of three pre-drilled crossbar holes.

**2.** Once you assemble them, the two middle sections will look like this. On both insert a short hanging-loop assembly into the middle pre-drilled crossbar hole and long hanging-loop assemblies into the outside pre-drilled crossbar holes.

**3.** Overhead view of where to dig holes for the ground sleeves.

**4.** Side view of the four U-shaped sections completely set up.

**5.** Side view of net completely set up.

**HOW TO SET UP YOUR JUGS OUTDOOR FRAME**

1. Check contents to make sure you have all needed parts.
   - Tubing:
     - Eight - 1½” x 15’-long galvanized tubing
     - Eight - 2½” x 3’-long galvanized tubing (ground sleeves)
     - Two - 1½” x 14’-long galvanized tubing
     - Two - 1½” x 18’-long galvanized tubing
   - Hanging-Loop Assemblies:
     - Twelve - hanging-loop assemblies (four long hanging-loop assemblies and eight short hanging-loop assemblies)

2. Dig holes and secure the 3’ sleeves into the ground. Use concrete to secure your 3’ sleeves into the ground.

3. End Sections: Insert a short hanging-loop assembly into each of three pre-drilled crossbar holes and secure all with cable clamps.
   - Middle Sections: Insert a short hanging-loop assembly into each of the middle pre-drilled crossbar holes and long hanging-loop assemblies into the outside pre-drilled crossbar holes and secure all with cable clamps.

4. Slide the middle 14’ crossbars into the uprights and fit into the sleeves.

5. Slide the end 18’ crossbars into the uprights and fit into the sleeves.

You are now ready to attach your netting to the frame.

**HOW TO ATTACH YOUR JUGS NET TO THE FRAME**

1. Lay your net out under the frame sections. Stretch it out completely from one end to the other.

2. Pick up the net by the nylon rope and attach it to the middle frame sections with the hanging-loop assemblies.

3. After hanging the net on the middle frame sections, making sure that it does not sag more than 1-2’, pull the ropes towards the end frames to stretch it out. Attach each rope to the end frame sections with the corresponding hanging-loop assemblies. See Figure 1.

4. Walk completely around the net, pulling and helping the net to stretch into shape.

The net will condense inside the box and will need a little help getting back into shape.

We recommend hanging your batting cage net with a minimum of 18” of netting on the ground. This will provide you with enough net and weight to prevent balls from slipping out underneath the sides and ends of the net.

You should not slide the net down or put any type of weight on the net to hold it down. This would cause the net to prematurely wear out because the net would not be allowed to “give” and absorb the batted balls.

Remember: For safety purposes, your net should be at least 2’ away from all poles or hard surfaces. That way, none of the batted balls can bounce back and injure someone.

**HOW TO ATTACH YOUR HANGING LOOPS TO THE CROSSBARS**

1. At each pre-drilled hole on the crossbar, hold the clamp and hanging-loop assembly with one hand and thread the cable through the pre-drilled hole with your other hand.

2. Wrap the cable around the crossbar and thread it back down into the cable clamp.

3. Slide the cable clamp up on the cable and tighten it, leaving one inch of cable hanging below. See Figure 2.

**CUSTOM NETTING** of all shapes and sizes now available, including: Batting Cage Nets, Backstops, Trapezoid Backstops, Outfield and Foul Ball Netting.

There are 3 Ways for you to get more information and FREE estimates on JUGS Custom Netting:

1. Call JUGS at 1-800-547-6843 and ask for a Net Specialist.

2. Fax your specifications to a Net Specialist at 503-691-1100.

3. E-mail your specifications to jims@jugssports.com.

WARNING: Do not leave your net and frame up during extreme weather conditions (high wind, snow), as non-warranty damage may occur.
1. Once you assemble them, the end sections will look like this. Insert a short hanging-loop assembly into each of three pre-drilled crossbar holes.

2. Once you assemble it, the middle section will look like this. Insert a short hanging-loop assembly into the middle pre-drilled crossbar hole and long hanging-loop assemblies into both outside pre-drilled crossbar holes.

3. OVERVIEW OF WHERE TO DIG HOLES FOR THE GROUND SLEEVES.

4. SIDE VIEW OF THE THREE U-SHAPED SECTIONS COMPLETELY SET UP.

5. SIDE VIEW OF NET COMPLETELY SET UP

WARNING:

Do not leave your net and frame up during extreme weather conditions (high wind, snow), as non-warranty damage may occur.

NOTE: Drawings are not to scale.

119-lb. and 191-lb. Breaking-Strength Knotted-Nylon Twine • One-Year Guarantee, Available in Dark Green Only

HOW TO ATTACH YOUR HANGING LOOPS TO THE CROSSBARS

1. At each pre-drilled hole on the crossbar, hold the clamp and hanging-loop assembly with one hand and thread the cable through the pre-drilled hole with your other hand.
2. Wrap the cable around the crossbar and thread it back down into the cable clamp.
3. Slide the cable clamp up on the cable and tighten it, leaving one inch of cable hanging below. See Figure 2.

HOW TO ATTACH YOUR JUGS NET TO THE FRAME

1. Lay your net out under the frame sections. Stretch it out completely from one end to the other.
2. Pick up the net by the nylon rope and attach it to the middle frame section with the hanging-loop assemblies.
3. After hanging the net on the middle frame section, making sure that it does not sag more than 1/2", pull the ropes towards the end frames to stretch it out. Attach each rope to the end frame sections with the corresponding hanging-loop assemblies. See Figure 1.
4. Walk completely around the net, pulling and helping the net to stretch into shape.

You should not stake the net down or put any type of weight on the net to hold it down. The net will condense inside the box and will need a little help getting back into shape. You cannot let the net sag more than 1/2". This would cause the net to prematurely wear out because the net would not be allowed to "give" and absorb the batted balls.

Remember: For safety purposes, your net should be at least 2' away from all poles or hard surfaces. That way, none of the batted balls can bounce back and injure someone.

HOW TO SET UP YOUR JUGS OUTDOOR FRAME

1. Check contents to make sure you have all needed parts.
2. Tubing:
   - Six - 1-1/2" x 15'-long galvanized tubing
   - Six - 2-1/2" x 3'-long galvanized tubing (ground sleeves)
   - Two - 1-1/4" x 14'-long galvanized tubing
   - One - 1-1/4" x 18'-long galvanized tubing
3. Hanging-Loop Assemblies:
   - Nine - hanging-loop assemblies (Two long hanging-loop assemblies and Seven short hanging-loop assemblies)
4. Dig holes and secure the 3' sleeves into the ground. Use concrete to secure your 3' sleeves into the ground.
5. End Sections: Insert a short hanging-loop assembly into each of three pre-drilled crossbar holes and secure all with cable clamps.
6. Middle Section: Insert a short hanging-loop assembly into the middle pre-drilled crossbar hole and long hanging-loop assemblies into both outside pre-drilled crossbar holes and secure all with cable clamps.
7. Slide the middle 18' crossbars into the uprights and fit into the sleeves.
8. Slide the end 14' crossbars into the uprights and fit into sleeves.
9. You are now ready to attach your netting to the frame.

NOTE: Drawings are not to scale.

Custom Netting of all shapes and sizes now available, including: Batting Cage Nets, Backstops, Trapezoid Backstops, Outfield and Foul Ball Netting.

There are 3 Ways for you to get more information and FREE estimates on JUGS Custom Netting:
1. Call JUGS at 1-800-547-6843 and ask for a Net Specialist.
2. Fax your specifications to a Net Specialist at 503-691-1100.
3. E-mail your specifications to jims@jugssports.com.

We recommended using a TWO HALF-HITCH KNOT when attaching the net ropes to the hanging-loop assemblies.

JUGS at 1-800-547-6843 and ask for a Net Specialist.
**HOW TO ATTACH YOUR CABLES TO THE EYE BOLTS**
1. Cut cable to appropriate length.
2. Run one end of your cable through the turnbuckle and secure using cable clamp. Tape end of cable to prevent fraying.
3. Hook turnbuckle on to eye bolt extending from the wall or frame section.
4. Repeat steps 2 and 3 at opposite end.
5. Pull tension to hold up the net.
6. Important: Tighten the cables so that they rest in cable hooks. (See diagrams #5 and #6.)

**Note:** You should provide for extra cable length when setting up initially. You can always cut off excess cable if not needed.

**HOW TO ATTACH YOUR HANGING LOOPS TO THE MIDDLE CROSSBAR**
1. Slide a cable clamp onto each of the three hanging-loop assemblies—two with longer cables and one with a shorter cable. You will attach the two longer ones near the ends of the crossbar and the shorter one at the center of the crossbar.
2. At each pre-drilled hole on the crossbar, hold the clamp and hanging-loop assembly with one hand and thread the cable through the pre-drilled hole with your other hand.
3. Wrap the cable around the crossbar and thread it back down into the cable clamp.
4. Slide the cable clamp up on the cable and tighten it, leaving one inch of cable hanging below.

**CUSTOM NETTING** of all shapes and sizes now available, including: Batting Cage Nets, Backstops, Trapezoid Backstops, Outfield and Foul Ball Netting.
