1. Once you assemble them, the end sections will look like this. Insert a short hanging-loop assembly into each of three pre-drilled crossbar holes.

2. Once you assemble it, the middle section will look like this. Insert a short hanging-loop assembly into both outside pre-drilled crossbar holes.

3. Overhead view of where to dig holes for the ground sleeves.

4. Side view of the three U-shaped sections completely set up.

5. Side view of net completely set up.

**HOW TO ATTACH YOUR JUGS NET TO THE FRAME**

1. Lay your net out under the frame sections. Stretch it out completely from one end to the other.
2. Pick up the net by the nylon rope and attach it to the middle frame sections with the hanging-loop assemblies.
3. After hanging the net on the middle frame sections, making sure that it does not sag more than 1-2”, pull the ropes towards the end frames to stretch it out. Attach each rope to the end frame sections with the corresponding hanging-loop assemblies. See Figure 1.
4. Walk completely around the net, pulling and helping the net to stretch into shape. The net will condense inside the box and will need a little help getting back into shape.

**NOTE:** We at JUGS recommend hanging your batting cage net with a minimum of 18” of netting on the ground. This will provide you with enough space to stretch out the net. See Figure 1.

5. Slide the end 14’ crossbars into the uprights and fit into sleeves.

**WARNING:** Do not leave your net and frame up during extreme weather conditions (high wind, snow), as non-warranty damage may occur.

**WARNING:** You should not stake the net down or put any type of weight on the net to hold it down. This would cause the net to prematurely wear out because the net would not be allowed to “give” and absorb the batted balls.

**NOTE:** For safety purposes, your net should be at least 2’ away from all poles or hard surfaces. That way, none of the batted balls can bounce back and injure someone.

**HOW TO ATTACH YOUR HANGING LOOPS TO THE CROSSBARS**

1. At each pre-drilled hole on the crossbar, hold the clamp and hanging-loop assembly with one hand and thread the cable through the pre-drilled hole with your other hand.
2. Wrap the cable around the crossbar and thread it back down into the cable clamp.
3. Slide the cable clamp up on the cable and tighten it, leaving one inch of cable hanging below.

**CUSTOM NETTING:** From Factory to You in less than 2 Weeks

All shapes and sizes now available, including: Batting Cage Nets, Backstops, Trapezoid Backstops, Outfield and Foul Ball Netting.

There are 3 Ways for you to get more information and FREE estimates on JUGS Custom Netting:

1. Call JUGS at 1-800-547-6843 and ask for a Net Specialist.
2. FAX your specifications to a Net Specialist at 503-691-1100.
3. E-mail your specifications to info@jugssports.com.

**WARNING:** Do not leave your net and frame up during extreme weather conditions (high wind, snow), as non-warranty damage may occur. Commercial use of JUGS Batting Cage Nets or JUGS Batting Cage Frames automatically limits this warranty to thirty (30) days after date of shipment.

**NOTICE:** Drawings are not to scale.

Tubing:

- Nine – hanging-loop assemblies (5/8” x 17’-long galvanized tubing)
- Six – 5/8” x 14’-long galvanized tubing
- Two – 5/8” x 18’-long galvanized tubing
- One – 5/8” x 19’-long galvanized tubing

Hanging-Loop Assemblies:

- Nine – hanging-loop assemblies (9/16” long hanging-loop assemblies and Same short hanging-loop assemblies)
- Two – short hanging-loop assemblies
- Five – 5/8” galvanized tubing
- Two – 5/8” x 14’-long galvanized tubing
- One – 5/8” x 18’-long galvanized tubing
- Two – 5/8” x 17’-long galvanized tubing
- 7/8” x 3’-long galvanized tubing (ground sleeves)
- Two – 3/8” x 2’-long galvanized tubing
- One – 1/2” x 3’-long galvanized tubing

**NOTE:** Drawings are not to scale.
