FIXED-FRAME **Short-Toss® Protective Screen**

Assembly Instructions

Step 1

Lay parts on the ground, as in this drawing. Frame sections are labeled as shown here.

Step 2

Assembled frame size:

Join the frame sections. Fasten together, using nuts, and short carriage bolts. tighten nuts with the supplied wrench.

IMPORTANT NOTE:

To eliminate net snagging always install nuts on the inside of the frame.

CARRIAGE BOLTS

will not come apart during practice or transport.

Step 4

Carefully tilt the frame and lay it on the ground. Stretch netting out, on the ground, in the same shape as the frame. Place the open end of the netting so it touches the top of the frame.

Stand in the center of the frame and begin feeding the netting onto the frame, like a pillowcase, alternating sides as you go. Fasten the netting to the frame at the bottom with the needle and twine. Follow the steps below to ensure proper installation.

Stand frame upright. Tie Gather netting together beginning knot securely under legs. at above location.

Insert needle through first mesh squares.

Needle goes back through the twine loop.

Pull twine tight

Tip screen onto its side
Insert needle through and gather the next two both mesh squares...

and back through twine

Your netting and frame should look like this.

Gather the next two mesh and back through squares and push needle the loop. through both of them...

Continue these steps, making sure to secure

each and every set of square mesh until you

reach the other legs.

Gather the next two mesh and back through squares and push needle through both of them..

IMPORTANT: needle and twine should go through every square mesh section

Tie end knot securely at above location.

Cut twine and burn end of twine with a match to prevent fraying.

should look like this when complete.
