

ASSEMBLY INSTRUCTIONS

QUICK-SNAP[®]

Multi-Sport Instant Cage[®]

SAVE THESE INSTRUCTIONS

WARNING

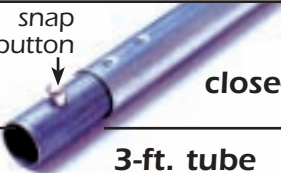

- **Adult supervision is required for set up and use of this cage. Follow Assembly Instructions.**
- **Nylon netting will fray, tear or break from normal use or abuse.**

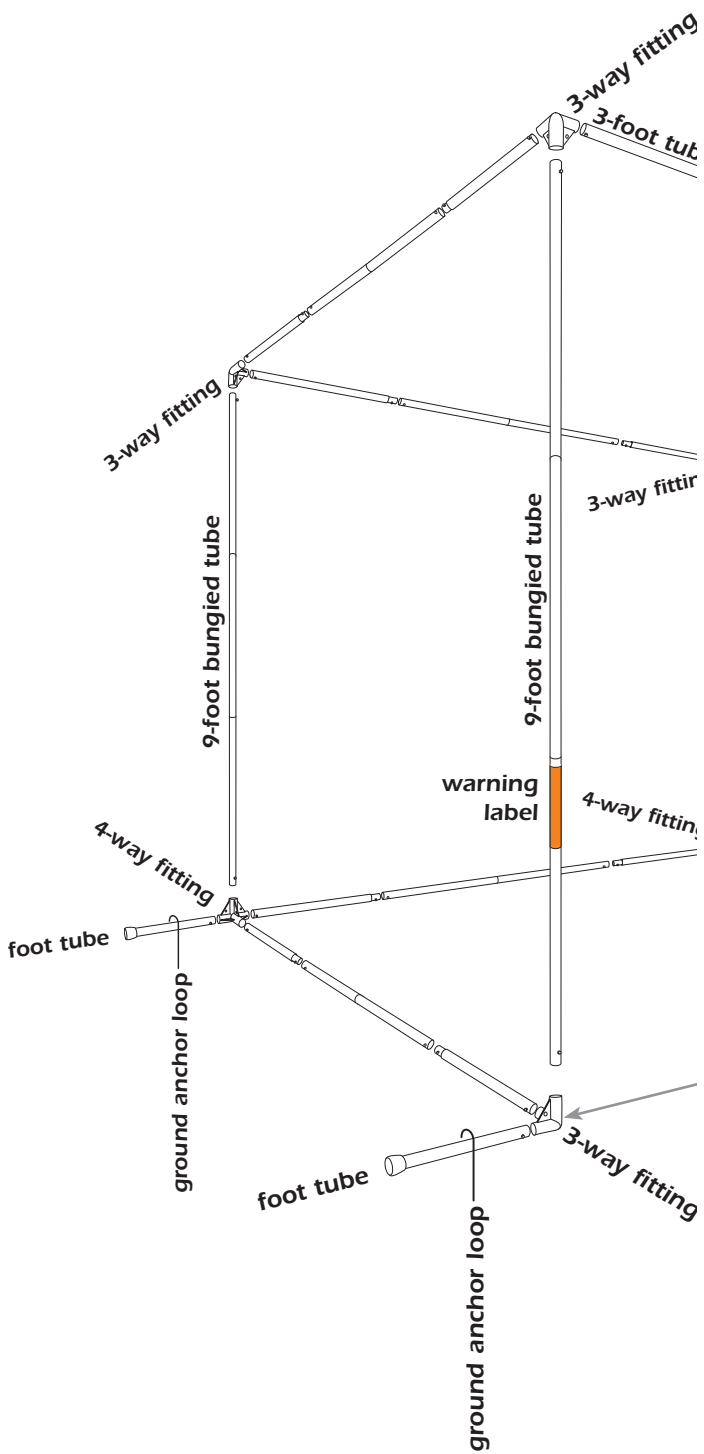

BEFORE EACH USE:

- **Thoroughly inspect the cage netting for any holes or signs of wear.**
- **Be sure that all frame tubing is undamaged and properly assembled on a level surface.**
- **The netting is designed to deflect when it is impacted by balls or other objects. Therefore, be sure that bystanders, other waiting participants, any structures or vehicles are no nearer than 8 feet from the outer sides of the cage when it is set up and in use.**
- **Be sure only one participant at a time uses the cage.**
- **Be sure the player's position is in line with, and in the center of, the cage opening.**
- **To avoid injuries or accidents, dismantle and store your JUGS Multi-Sport Instant Cage® when wind velocities are anticipated to be greater than 15 mph. See warranty information.**

JUGS Multi-Sport Instant Cage[®] ASSEMBLY INSTRUCTIONS

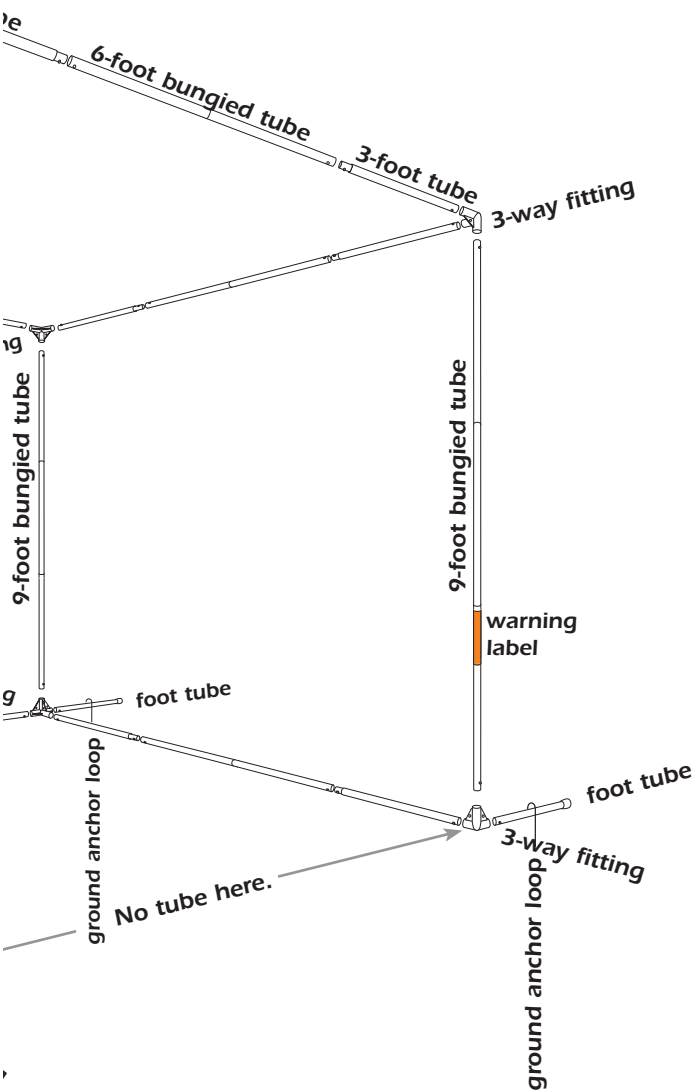

Remove the frame sections and netting from your carrying bag and group them as you see in the inventory below. Then follow these easy steps.

PARTS INVENTORY	
QTY.	DESCRIPTION
3	 carrying bag & netting
6	 3-way fitting
2	 4-way fitting
14	 close-up snap button
	 3-ft. tube
7	 6-ft. bungied tube
4	 9-ft. bungied tube
4	 foot tube
4	 ground anchor loop

IMPORTANT: When using your JUGS Multi-Sport Instant Cage® outdoors, you must stake it down with the **ground-anchor loops**.

IMPORTANT: (BE SURE THE 9-FOOT BUNGIED TUBES WITH THE WARNING LABELS ARE ON THE FRONT SIDE OF THE CAGE AND THAT THE LABELS ARE RIGHT-SIDE UP.)

The JUGS Multi-Sport Instant Cage® **frame** is guaranteed for five (5) years, and The JUGS Multi-Sport Instant Cage® **netting** is guaranteed for one (1) year, against defects in material or workmanship, unless it is damaged by misuse, negligence, or accident—or exposed to extremes of weather such as snow, ice, high winds, or other acts of God.

Important Warranty Note:

For easy set-up and dismantling, your JUGS Multi-Sport Instant Cage® is made of lightweight materials. If left outside, it will be exposed, like all outdoor structures, to stresses from wind, snow and ice. However, it is not designed to withstand wind more than a moderate breeze. In order to prevent your cage from being damaged, you must dismantle it and store it indoors whenever wind velocities for your area are anticipated to be in excess of 15 miles per hour. Never leave your cage set up outside during snow storms or in freezing rain. Failure to comply with these restrictions will void your warranty.

QUICK-SNAP® BASICS

When erecting the Multi-Sport Instant Cage®, connect the sections of bungied tubes together, as shown below.

Twist them to align the lock button with the lock hole, as shown below.

Depress the lock button and slide the two sections of tubing together. Be sure the lock button springs back securely inside the lock hole.

STEP 1

Erecting the Roof Frame:

Insert the wider end of a 3-foot tube into a 3-way fitting. Next, insert the narrow end into a 6-foot bungied tube, as shown below.

Insert another 3-foot tube into the other end of the 6-foot bungied tube. You will now have a 12-foot length of tubing, as shown below.

Repeat this process three times, and assemble the resulting four 12-foot lengths into a square. The roof frame is now complete.

STEP 2

Erecting the Wall Frame:

Insert a 9-foot bungied tube into one of the 3-way fittings in your square, as shown below.

Repeat this process until all four 9-foot bungied tubes are attached, as shown below.

STEP 3

Attaching the Netting:

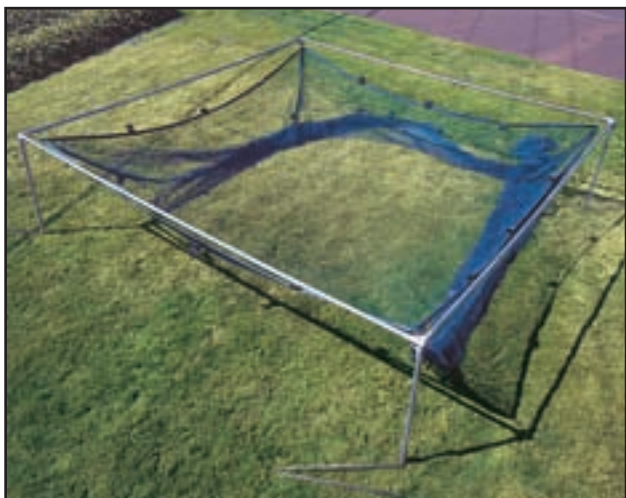

Remove the netting from the box. The netting is marked to identify "TOP FRONT," "TOP REAR" and "BOTTOM REAR." Position the netting over the square frame according to these markings, as shown below.

Using the hooks attached to the net, fasten all four corners of the top of the net to the top holes in the 3-way fittings, as shown below.

After attaching the four corners of the net to the frame, it should look like the one below.

Attach the remainder of the top part of the net, by wrapping the Velcro® strips (sewn onto the edges of the net) around the frame. It should look like the one in the photo below.

STEP 4

Erecting the Corner Posts

Connect the middle section of the 9-foot bungied tube to the top section of the 9-foot bungied tube as shown below.

Connect the bottom section of the 9-foot bungied tube to the middle section of the 9-foot bungied tube as shown below.

Repeat this process until all four corners of your frame have a straight 9-foot bungied tube. The corner posts are now nine feet high.

IMPORTANT:

(BE SURE THE 9-FOOT BUNGIED TUBES WITH THE WARNING LABELS ARE ON THE FRONT SIDE OF THE CAGE AND THAT THE LABELS ARE RIGHT-SIDE UP.)

STEP 5

Attaching the Wall Netting:

Attach the Velcro® strips, on the sides of the net, to the frame by wrapping them around the corner post sections, as shown below.

After completing steps 1 through 5, your cage should look like the one in the photo below.

STEP 6

Assembling the Base Frame:

Using the remaining tubes and fittings, lay out the base frame and assemble it, as shown below.

Attach a foot tube to each outside fitting in the base frame, as shown below.

STEP 7

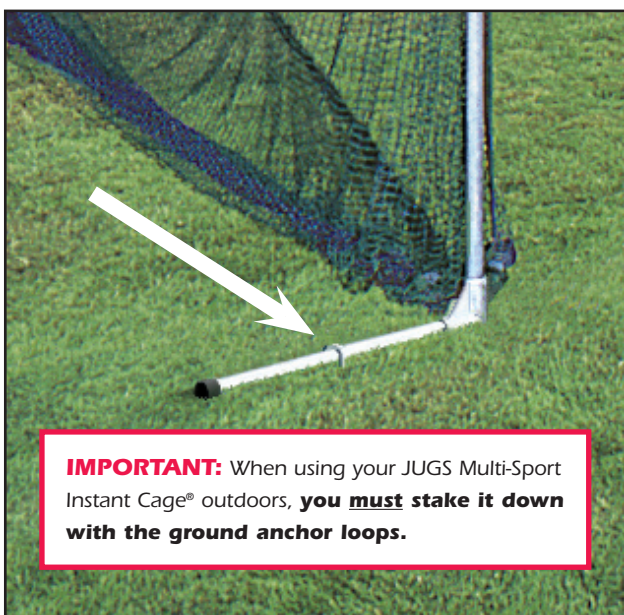

Attaching the Base Frame to the Corner Posts:

Move the base frame under the corner posts. For best results, we recommend one person be at each corner of the base frame. Then connect the corner post tubes to the fittings in the base frame.

STEP 8

For Outdoor Use:

Put ground-anchor loops into the ground so that they completely engage the foot tubes, as shown in the photo below.

Below, is a view of the Multi-Sport Instant Cage[®], fully assembled.
